filter header

- Tech Stack
Vuejs, Tailwindcss,

- Filter

1. Tags filter - Clicking on tags filter will display the list of all the symbols with those tags.
2. Date range filter – filter items within that date range.

Based off filters, trades will be displayed (latest ones first).

By default, 30 trades are displayed

List will display date, time, Profit & Loss with a different color whether it's positive or negative, tags, and the beginning of the notes.

As shown, when all the tags cannot be displayed a +n (n being the number of tags not displayed) is displayed.
